

IMPORTANT NOTICE: SUCTION HARVESTING CONTINUES

Aaron is planning an additional work session this weekend (weather permitting)

Saturday, Aug. 1st OR Sunday, Aug. 2nd at 8 AM

VOLUNTEERS ARE ALWAYS NEEDED!!!

- **DIVERS:** to do the underwater work

Some have said they would be divers; it is time to participate if you can because suction harvesting, as a significant solution to our milfoil problem requires a cadre of people trained, able & willing to do this job.

- **WORKERS ON THE HARVESTER:** to move the retrieved milfoil into bags for transportation to shore

Some strength is needed for this job; many older folks cannot do it, so younger people, come forward and offer to help please.

- **BOATERS/KAYAKERS:** to help scoop up stray pieces of milfoil, using a small net or similar "catching" device; & to keep boats from approaching where diver is located

This is a job that does not require strength! Kids can do this using their kayaks & paddle boards - & some type of net to catch the stray pieces of milfoil.

SEND your name, contact information, including phone #, and what job you can do to:

Aaron (plumsupply@aol.com)

If you are able, please step up and do your part.

Thank you!
